

## Case Management Boot Camp - Beyond Basics

12:00—1:00 pm

5-Part Webinar Series

Starts January 12, 2023

Case management is truly the center of the universe, not only in acute care and critical access hospitals, but for many of the levels of care across the post-acute care continuum. Having a foundation for effective case management is critical, but likewise, having a foundation for the more complex processes of case management has become vital. Challenges exist for RN case managers, social work case managers, case management leaders, and physicians, as they traverse this shaky world of constantly changing reimbursement, updated rules and regulations and strategic process improvement to align with any hospital's need to meet their targeted outcomes.

This webinar series will provide you with the latest and most up-to-date topics and information that you will need to be at the top of your game and produce the best outcomes for you, your patients, and your organization. It provides you with a higher level of case management practice as you continue your journey to become a more effective RN case manager, social work case manager, case management leader, or physician leader.
