

## Neonatal Babies: Immediate Care & Transport

April 4, 2023

1:00—2:00 pm

Webinar

### Description

Neonate babies are a special population that require a calm and systematic approach to assessment and care. By using the STABLE assessment platform, you will have improved comfort in these situations. Identifying when and how to request a NICU transport team can be confusing. This presentation will help clarify Level iii and Level ii NICU capabilities and how a NICU transport team can help you. This program will cover what to do with neonate babies when they unexpectedly arrive at your facility.

### Key Learning Objectives:

- Support the neonatal patient in an appropriate manner until the transport team arrives
- Recognize the signs or indications that neonatal transport is necessary for a neonatal patient
- Initiate the referral process for neonatal transport

**Who Should Attend:** EMT's, Paramedics, First Responders, RN's, and Medical Providers.

**Instructor:** North Memorial Air Care Staff

Continuing Education: Contact Hours: 1.0

*This workshop is designed to meet the continuing education requirements for the MN Board of Nursing. It is the responsibility of the attendee to determine whether these activities meet the current criteria for continuing education.*
